antitrust/competition

The chairperson of the CCI, has observed recently that "Compliance is like the Truth, and not a mathematical formula to match the juggle. There are penalties and fines for non-compliance. The companies also lose credibility if found violating the Competition Compliance. So, the costs of violations are extremely high. There are no formulas defining the violations but there are a host of factors derived from the behavioural aspects". Khare Legal Chambers' antitrust team offers to its clients a "one stop" competition law legal service in relation to: competition law litigation, i.e representing clients both for the informant and defendant in cases of anti competitive agreement and abuse of dominance, including class action litigations; compliance and risk management; merger filings and transaction advisory; and competition law advisory.
